No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

# Contents of Volume 66

## Number 1, September 1978

*Full Papers*

J. P. Blanchet. Changes in Erythrocyte Membrane Antigens in Developing Fetal and Postnatal Mice ..... 1

Gail R. Martin, Sandra Smith, and Charles J. Epstein. Protein Synthetic Patterns in Teratocarcinoma Stem Cells and Mouse Embryos at Early Stages of Development ..... 8

E. Marlo Nelsen. Transformation in *Tetrahymena thermophila*. Development of an Inducible Phenotype ..... 17

Geoff Richards. Sequential Gene Activation by Ecdysone in Polytene Chromosomes of *Drosophila melanogaster*. VI. Inhibition by Juvenile Hormones 32

Winfried Deimann and H. Dariush Fahimi. Peroxidase Cytochemistry and Ultrastructure of Resident Macrophages in Fetal Rat Liver. A Developmental Study ..... 43

Philip G. Constantinides, Shirley M. Taylor, and Peter A. Jones. Phenotypic Conversion of Cultured Mouse Embryo Cells by Aza Pyrimidine Nucleosides ..... 57

Patrick W. Tank and Nigel Holder. The Effect of Healing Time on the Proximodistal Organization of Double-Half Forelimb Regenerates in the Axolotl, *Ambystoma mexicanum* ..... 72

Francis C. Davis and Rosemary W. Davis. Polyadenylation of RNA in Immature Oocytes and Early Cleavage of *Urechis caupo* ..... 86

Masaru Imada and Noboru Sueoka. Clonal Sublines of Rat Neurotumor RT4 and Cell Differentiation. I. Isolation and Characterization of Cell Lines and Cell Type Conversion ..... 97

Masaru Imada, Noboru Sueoka, and Daniel B. Rifkin. Clonal Sublines of Rat Neurotumor RT4 and Cell Differentiation. II. A Conversion Coupling of Tumorigenicity and a Glial Property ..... 109

Moti Nissani and Kim Fellinger. A Method for Studying Tissue Specificity of Maternally Affected *Drosophila melanogaster* Mutants: Mosaic Analysis of *cinnamon* ..... 117

H. W. Brock and R. Reeves. An Investigation of *De Novo* Protein Synthesis in the South African Clawed Frog, *Zenopus laevis* ..... 128

Barbara Kay Grove and Frank E. Stockdale. Membrane Function in Differentiating Skeletal Muscle Cells. I. Kinetic Analysis of Amino Acid Transport ..... 142

James W. Lash and N. S. Vasan. Somite Chondrogenesis *in Vitro* Stimulation by Exogenous Extracellular Matrix Components ..... 151

Robert J. Shih, Clare M. O'Connor, Kirsten Keem, and L. Dennis Smith. Kinetic Analysis of Amino Acid Pools and Protein Synthesis in Amphibian Oocytes and Embryos ..... 172

Paul C. Letourneau. Chemotactic Response of Nerve Fiber Elongation to Nerve Growth Factor ..... 183

G. L. Waring, C. D. Allis, and A. P. Mahowald. Isolation of Polar Granules and the Identification of Polar Granule-Specific Protein ..... 197

Philip H. Bonner. Nerve-Dependent Changes in Clonable Myoblast Populations ..... 207

Sui Bi Atienza-Samols and Michael I. Sherman. Outgrowth Promoting Factor for the Inner Cell Mass of the Mouse Blastocyst ..... 220

Betty L. Black and Florence Moog. Alkaline Phosphatase and Maltase Activity in the Embryonic Chick Intestine in Culture. Influence of Thyroxine and Hydrocortisone ..... 232

*Brief Notes*

Carl N. McDaniel. Determination for Growth Pattern in Axillary Buds of *Nicotiana tabacum* L. ..... 250

John R. McCarrey and Ursula K. Abbott. Chick Gonad Differentiation following Excision of Primordial Germ Cells ..... 256
Nurith Kurn, Mark Colb, and Lucille Shapiro. Spontaneous Frequency of a Developmental Mutant in *Volvox* ..... 266
Gail T. Qualls, Karen Stephens, and David White. Morphogenetic Movements and Multicellular Development in the Fruiting Myxobacterium, *Stigmatella aurantiaca* ..... 270
Tuneo Yamada and John J. Beauchamp. The Cell Cycle of Cultured Iris Epithelial Cells: Its Possible Role in Cell-Type Conversion ..... 275
B. J. Hyer and L.-N. L. Chan. Initial Synthesis of Globin Peptide Chains in Differentiating Embryonic Red Blood Cells ..... 279

Number 2, October 1978

*Full Papers*

James F. Grutsch and Anthony Robertson. The cAMP Signal from *Dictyostelium discoideum* Amoebae ..... 285
Karen A. Knudsen and Alan F. Horowitz. Differential Inhibition of Myoblast Fusion ..... 294
Roslyn W. Orkin and Bryan P. Toole. Hyaluronidase Activity and Hyaluronate Content of the Developing Chick Embryo Heart ..... 308
Michael A. Derby. Analysis of Glycosaminoglycans within the Extracellular Environments Encountered by Migrating Neural Crest Cells ..... 321
Jill D. Fabricant and Edward L. Schneider. Studies of the Genetic and Immunologic Components of the Maternal Age Effect ..... 337
Ronald A. Simkins, Howard J. Eisen, and Walter H. Glinsmann. Functional Integrity of Fetal Rat Liver Explants Cultured in a Chemically Defined Medium ..... 344
Ronald A. Simkins, Howard J. Eisen, John W. Sparks, and Walter H. Glinsmann. Development of Glucogenesis from Galactose by Fetal Rat Liver Explants in Organ Culture ..... 353
R. P. Yeh, F. K. Chan, and M. B. Coukell. Independent Regulation of the Extracellular Cyclic AMP Phosphodiesterase-Inhibitor System and Membrane Differentiation by Exogenous Cyclic AMP in *Dictyostelium discoideum* ..... 361
Judith Ilan and Joseph Ilan. Translation of Maternal Messenger Ribonucleoprotein Particles from Sea Urchin in a Cell-Free System from Unfertilized Eggs and Product Analysis ..... 375
Gregory A. Nelson, Kenneth K. Lew, and Samuel Ward. Intersex, A Temperature-Sensitive Mutant of the Nematode *Caenorhabditis elegans* ..... 386
Thomas H. Meedel and J. R. Whittaker. Messenger RNA Synthesis during Early Ascidian Development ..... 410
Ilan I. Deák. Thoracic Duplications in the Mutant *wingless* of *Drosophila* and their Effect on Muscles and Nerves ..... 422
Carolyn H. Buzin, Susan A. Dewhurst, and Robert L. Seecof. Temperature Sensitivity of Muscle and Neuron Differentiation in Embryonic Cell Cultures from the *Drosophila* Mutant, *shibire*$^{ts1}$ ..... 442
Martin Friedlander, Eric C. Beyer, and Donald A. Fischman. Muscle Development *in Vitro* following X Irradiation ..... 457
J. U. Correa, E. M. Lemos, and W. R. Lodi. Inhibition of Sporulation in the Water Mold *Blastocladiella emersonii* by Antipain ..... 470
S. Katsura and S. Inazumi. Presence of Acid Phosphatase Activity in Heavy Bodies of Sea Urchin Eggs ..... 480
D. Paulin, J. F. Nicolas, M. Yaniv, F. Jacob, K. Weber, and M. Osborn. Actin and Tubulin in Teratocarcinoma Cells. Amount and Intracellular Organization upon Cytodifferentiation ..... 488
Darwin K. Berg. Acetylcholine Synthesis by Chick Spinal Cord Neurons in Dissociated Cell Culture ..... 500

MICHAEL D. COUGHLIN, MARK D. DIBNER, DAHNA M. BOYER, AND IRA B. BLACK. Factors Regulating Development of an Embryonic Mouse Sympathetic Ganglion ..... 513

GEOFFREY GOLDIN AND BARRY FABIAN. The Regulation of Growth in the Mesonephric Kidney of Adult *Xenopus laevis* by an Endogenous Inhibitor of Proliferation ..... 529

HENRY SMILOWITZ AND GERALD D. FISCHBACH. Acetylcholine Receptors on Chick Mononucleated Muscle Precursor Cells ..... 539

MICHAEL J. DEWEY AND BEATRICE MINTZ. Direct Visualization, by β-Galactosidase Histochemistry, of Differentiated Normal Cells Derived from Malignant Teratocarcinoma in Allophenic Mice ..... 550

*Brief Notes*

MICHAEL J. DEWEY AND BEATRICE MINTZ. Genetic Control of Cell-Type-Specific Levels of Mouse β-Galactosidase ..... 560

DIANNE FRISTROM AND CAROL CHIHARA. The Mechanism of Evagination of Imaginal Discs of *Drosophilia melanogaster*. V. Evagination of Disc Fragments ..... 564

ELIEZER LIFSCHYTZ. Uncoupling of Gonial and Spermatocyte Stages by Means of Conditional Lethal Mutations in *Drosophila Melanogaster* ..... 571

EITATSU HO AND YUTAKA SHIMADA. Formation of the Epicardium Studied with the Scanning Electron Microscope ..... 579

J. J. MERMOD AND M. CRIPPA. Variations in the Amount of Polysomes in Mature Oocytes of *Drosophila melanogaster* ..... 586

LESLIE P. KOZAK. Increased Synthesis of L-Glycerol 3-Phosphate Dehydrogenase during *in Vitro* Differentiation of Reaggregating Cerebellar Cells ..... 593

*Author Index for Volume 66* ..... 601

The Subject Index for Volume 66 will appear in the December issue as part of a cumulative index for the year 1978.

## Information for Authors

*Developmental Biology* will publish papers on problems of development in the broadest sense. Embryonic and postembryonic development, growth, regeneration and tissue repair in plants and animals, and the analysis of these phenomena at the molecular and cellular levels are topics suitable for the journal. Papers on reproductive biology, aging, and teratology will be published only when they bear on developmental mechanisms of general interest. Papers are sought that employ the techniques and concepts of many disciplines including those of biochemistry, biophysics, cytology, experimental morphogenesis, genetics including cell genetics, immunology, neurobiology, physiology, and microbiology. In all areas, analytical rather than descriptive studies will be favored.

*Original papers* only will be considered. Submission of a manuscript implies the authors' assurance that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Explicit proof of these implied assurances may be required at the Editor's discretion. Articles and any other material published in *Developmental Biology* represent the opinions of the author(s), and should not be construed to reflect the opinions of the editor(s), the publisher, or the Society of Developmental Biology.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

*Articles* usually do not exceed 15,000 words and must be preceded by an abstract of about 200 words that should be fully intelligible by itself. Brief notes are 2500 words or less, including the bibliography, and should have an abstract of less than 100 words. All papers will be published in English.

*Manuscripts* should be concise. Full documentation of results in support of conclusions should be combined with maximum brevity compatible with clarity. The discussion section should relate the present work to previous knowledge but should not be expanded into a review of the field. The standard order of sections is: abstract, introduction, materials and methods, results and discussion. Combined results and discussion may be used. In the manuscript acknowledgment, references, footnotes, tables, and figure legends should follow the discussion in that order. All pages of the manuscript should be numbered consecutively and typed double-spaced throughout. Authors should provide a running title of 35 letters and spaces or less. Use footnotes sparingly. Cite them with superscript numbers and type them on a separate sheet. With rare exceptions do not italicize for emphasis.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

*Abbreviations and units* should be used consistently. Consult the lists published in the *Proceedings of the National Academy of Sciences (U.S.A.)* the *Journal of Biological Chemistry,* and *Biochemistry* for standard abbreviations which need not be defined. Collect all abbreviations into a footnote and refer to it at the first use of an abbreviation.

The use of units should follow the Système International. Use prefixes, e.g., $\mu$M, not $10^{-6}$ M. Note that *M* stands for molar, not mole. Use hr, min, sec, rpm, and cpm without definition, without a period, and without an "s" in the plural (i.e., 20 min).

*Figures* should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Mark all figures with the author's name.

*Line drawings* should be made with India ink on smooth white paper or professional-quality drafting paper. Do not submit original line drawings larger in size than 13 x 10 in.; instead enclose smaller prints. Good quality prints are acceptable in any case. Drawings will be reduced as much as is compatible with the complexity of the figure, usually to column or page width. The lettering should be large enough to be at least 1.5 mm high after reduction.

*Photographs* should be the actual size for reproduction and labeled with letters 2 to 4 mm high. Figures should fit column or page width and should be at most 8 in. long. If the author decides to bleed the page (no margins), labels and figure numbers should be no closer than 3/4 in. to the margin. Figures to be bled must be 7 × 10 1/4 in. (17.8 × 26 cm) to allow trimming. When several figures appear together as one plate, mount them on cardboard or paper as close together as possible. The engraver will tool thin white lines between figures. Give magnifications in the legends or indicate them with a scale marker on the photograph. The second copy of each manuscript must include good-quality glossy prints of all photographs. Two reviewers' copies should be submitted when originals are oversized or mounted on heavy cardboard. The author will defray the expense of color plates.

*Tables* should be typed on separate pages and numbered consecutively with Arabic numerals, and each should have a concise heading.

*References* to the literature should be cited as: Doe (1965) has observed that . . . ; (Doe, 1955); Doe *et al.* (1960) should be used in the case of articles with more than two authors. Use suffices a, b, etc. following the date to distinguish two or more works by the same author(s) in the same year (Doe, 1960a, b). Numbered references will no longer be accepted. Arrange literature citations in the bibliography alphabetically according to the surname of the author, using the following order of items: author(s), date of publication, title of article or book, journal name, volume number, inclusive pages, publisher and city (for books only). Abbreviate titles of journals according to *Chemical Abstracts' Service Source Index*.

*Page proofs* rather than galleys will be sent. This speeds production. Detailed instructions will be sent with proofs. A quick response and minimal changes on proof are imperative to maintain schedules.

*Features* will include announcements of meetings and courses in the field of developmental biology, and some meeting reports. Persons interested in preparing meeting reports are encouraged to contact the Editor.

*To submit* a manuscript, send two copies to Igor B. Dawid, Department of Embryology, Carnegie Institution of Washington, 115 West University Parkway, Baltimore, Maryland 21210, Tel. (301) 235-0460. Indicate the name, address, and telephone number of the author who should be contacted in editorial matters.
